

REPORT OF THE GLOBALEX MANAGEMENT COMMITTEE MEETING FOR NOVEMBER 2019

Attending the Globalex virtual meeting on 19 November were Ed Finegan, Ilan Kernerman, Simon Krek, and Lars Trap-Jensen. This Report summarizes the meeting highlights.*

Globalex workshops

1) No word received yet about the workshop planned for the Language Resources and Evaluation Conference (LREC, <https://lrec2020.lrec-conf.org/en/>), May 11-16 in Marseille. As detailed in October's report, this would be a full-day workshop on linked lexicography, co-organized by Ilan and Simon and including a monolingual track in conjunction with ELEXIS (managed by John McCrae, Galway) and a bilingual and multilingual track in conjunction with TIAD (Translation Inference Across Dictionaries), managed by Jorge Gracia (Zaragoza) and Besim Kabashi (Erlangen-Nürnberg)."

2) Preparations for the workshop at the Afrilex meeting continue.

3) The papers to be presented at the Globalex workshop at Euralex in Alexandroupolis, Greece, will be organized into a special issue of an appropriate journal; publication in the *International Journal of Lexicography* is under consideration.

4) To strengthen the reputation of the various journals and increase the likelihood of indexing by Thompson-Reuters, citation to the other lexicography journals, wherever appropriate, is strongly urged.

Website. Further refinement of the home page of the Globalex website is under consideration.

Miscellany. The possibility and desirability of Globalex becoming a site where lexicographers would look for state-of-the-art training courses of relevance to lexicography was endorsed. There would likely need to be a representative from each Continental Association to report what is going on locally to a central source (Lars volunteered to do this); ELEXIS may offer support for an assistant to help with the work.

*The management committee keeps minutes of its meetings; this summary report informs the Continental Associations of the matters discussed and provide a document to share with their members.
